AND SNEZANA VESNIC
UNIVERSITY OF BELGRADE

CRITS:

HÉLÈNE FRICHOT
KTH, STOCKHOLM
ALESSANDRO ROCCA
POLITECNICO DI MILANO

Call for Students

www.innovationinpractice.it

In the course of ten days of successive and parallel workshops, students will engage with a process of public transformation of a former industrial site in the city of Turin. The site was the subject of a call for applications promoted by the Co-City competition (winner of the first European Urban Innovative Actions call) that proposed the design of forms of collaboration between administration and active citizenship, and now suspended. With the purpose of 'unlocking' a blocked process of transformation of public goods, students will experiment different approaches to the agency of design actions. Through scientific contributions offered by experts in their own field from five different European institutions, the Summer School will give students the tools to strategically approach complex procedural problems through architectural design as a collective and socio-technical tool for action, and to effectively intervene as actors within a diachronic design process.

We are looking for enthusiastic and outstanding Master students of Architecture. We will select 3 students from each of the following institutions: KTH, Architectural Association London, University of Belgrade, TU Berlin, Politecnico di Milano, Politecnico di Torino. Additionally, we will accept up to 5 outstanding students from any institution.

Tuition is free and students will take care of travel and accommodation expenses. The workshop will be held in English, and a good level of proficiency is expected from all participants.

To apply, send the following to apply@innovationinpractice.it by June 25th: an updated CV, a five-page, A4 landscape portfolio, and a motivation letter of 400 words or less. Applications will be reviewed by the workshop tutors and coordinating team and the results will be communicated by June 30th.
